

Invitation Letter

CSPE Environmental Technology&Facility Committee

Earlier this year China released (complete the waste to energy subsidy policy),("12th Five-Year" municipal waste disposal, facilities construction plan). These two intensive policy will promote the waste to energy market development significantly.

To explore waste to energy industry 's future development strategy, exchange the domestic and international latest and most environmentally friendly WtE technology, share the successful experience of domestic and international enterprises in WtE, hereby Asia Waste to Energy Congress 2012 will be scheduled on November 15th-16th in Shanghai.

We sincerely invite you taking the time to attend the " Asia Waste to Energy Congress 2012 " to share with us your views and suggestions concerning the WtE. We look forward to provide a platform for the entire WtE supply chain, promote the policy complement, business cooperation, networking the technology as well, make a contribution for the energy efficient environmental friendly WtE industry.

Looking forward to your support and attendance!

July 12th 2012
